

Minor Corrections

This document provides minor corrections (that do not change the conclusion) for the paper:

Yen-Chia Hsu, Jennifer Cross, Paul Dille, Michael Tasota, Beatrice Dias, Randy Sargent, Ting-Hao (Kenneth) Huang, and Illah Nourbakhsh. 2019. Smell Pittsburgh: community-empowered mobile smell reporting system. In Proceedings of the 24th International Conference on Intelligent User Interfaces (IUI 2019). ACM.

We apologize for the following errors:

- In Figure 6, all the texts (both in the figure and in the caption) that mention “north-south” wind directions need to be replaced with “east-west” wind directions. Also, conversely, all the “east-west” wind directions need to be replaced with “north-south” wind directions.
- In the caption of Table 2 and the second paragraph of section 5.1 (System Usage Study), the “interquartile range” texts need to be replaced with “semi-interquartile range.”
