

What do you think about the data visualization on the channel?
(For instance, the map, the chart, and the personal stories.)

How will you use the data that are visualized on the channel?

What can you do now with the channel that you were unable to do in the past?

Are there particular features on the channel that you like and dislike the most?

What are possible features that you think the channel can support in the future?

Do you have other comments?
